12. Variances

A brief explanation must be given for the major differences between actual and budgeted figures on a consolidated and per option level.

An explanation is preferable for all variances of more than 10%.

13. Graphs and Tables

Graphs and tables are suggested to enable users of the statements, especially NAMFISA,

members and trustees, to distinguish at a glance the most important performance and statistical indicators.

Most of these indicators will appear in the financial statements, this annual report, notes or ratios, but they are easier to summarise and understand when it is presented graphically.

It might be useful to compare the monthly and cumulative figures and ratios with not only the previous period, but also with the budget.

The following list is not exhaustive and is merely an example of what could be presented in the monthly management accounts to ensure that the Board of Trustees is making informed decisions. They are recorded in the sections above of the annual report of the fund:

Membership

- The average age and pensioner ratio of beneficiaries per benefit option.
- The chronic distribution of beneficiaries.
- Analysis of member movement (e.g., reason(s) given by members for leaving the fund: death, new employment, etc.).
- A graph depicting the number of members per month for current year, previous year and budget.

Non-healthcare expenditure

- A graph of the total non-healthcare expenditure as a percentage of risk contribution income per month.
- A graph of the non-healthcare expenses per average beneficiary per month.
- Details on contractual administration and managed care: managed services fees payable.

Underwriting performance

- A graph of the total contributions per member per month, compared to benefit costs per member per month. A moving 12-month average can also be depicted.
- A graph of claims paid as a percentage of risk contribution income per month. This must also be compared with previous periods. This could also be depicted on a per member per month basis.
- A graph of the operating results as a percentage of risk contribution income.

Claims/benefits

- A pie chart of benefits paid by category i.e., hospitals, medicines, specialists etc. A comparison with previous periods and other funds or industry averages, if available, is useful.
- A list of the highest claims by category, compared to previous periods.
- A table of the average claims cost per member, by category of service, compared to previous periods.
- Analysis of claims paid aged over service dates. For each month's claims paid indicate the percentage of previous month's claims paid in current month, as well as the percentage claims paid relating to the current month.
- Comparison of actual claims paid with the monthly IBNR provision.

- Chronic utilisation of beneficiaries.

Other indicators

14. Detailed investment schedule

This can be a separate schedule.

The investment schedule must be completed per individual investment. It is important to provide the market values of all the underlying assets of all policies of insurance and collective investment funds (i.e., unit trust, wrap funds, funds of funds etc.).

Institution	Type Of Investment	Date Invested	Interest Rate	Opening Balance at Market Value	Dividends & Interest Capitalised	Market Value Adjustment	Closing Balance at Market Value

15. Annexure covering compliance testing in terms of Standard No. MAF.S.7.3 and Regulation No. MAF.R.7.2

The schedule below needs to be completed to ensure that the limitations on assets as per Annexure B are being complied with.

Annexure B item	Category or kinds of asset Reflect each of the asset classes as defined in the appropriate Standard	Description	Market value (R)	% Market value	Maximum % of aggregate fair value of liabilities and the minimum accumulated funds to be maintained in terms of Standard MAF.S.7.3 and Regulation MAF.R.7.2	Comment (i.e., compliant/ Non-compliant. If non-compliant state reasons).

Explanatory notes and conditions covering compliance testing: These notes must align to the Standard covering the kinds of asset types allowed and the required limitation on the % allowed too in the appropriate Standard and regulations applicable.

48. The risks to be identified must not be limited to those which have a financial consequence, but must include risks which relate to the governance of the fund, and which may jeopardise the governance structure.

49. The fund is not expected to micro-manage the functions delegated to service providers, but those functions must, when delegated, contain sufficient detail to ensure that the service provider understands what is expected by the board and provide for reasonable right of recourse in the event that there is any breach of the delegated functions by the service provider.
